YARDS AT CARBON AND SWALWELL

LITTLE ITEMS OF LOCAL INTEREST

Mr. and Mrs. T. J. Ramsay and An-
nabelle and Mr. and Mrs. H. McNau-
ghton motored to Ponoka on Sunday.

Members of the Irticana Golf Club
will play in Carbon on Sunday, when
they will complete the final 18 holes
of the 36 hole match for the Herald
Play offs. The Carbon course will be
in shape by that time.

There will be a Bridge and Whist
drive in aid of the Carbon school fair,
in room 4 of the Carbon school on
Friday, June 28th at 8 p.m. Admis-
sion 50c.

I. Guttman's new store is about
ready to move into. The new plate
glass windows were put in on Tues-
day and this will give Mr. Guttman
the best display windows in Carbon.

A. F. McKibbin motored to Cham-
pion on Sunday to get Mrs. McKibbin
and daughter and Miss Watkins, who
have been spending the past couple of
weeks visiting at their home there.

Mrs. A. Reid and grand daughter,
Agnes Skerry, left last Thursday for
a couple of months holiday at the Pa-
cific coast.

There will be English church serv-
ices in the Farmers Exchange hall on
Sunday next at 7.30 p.m.

Mr. and Mrs. Burtrand and family
of Calgary spent the week end visit-
ing with Mrs. Burtrand's parents, Mr.
and Mrs. C. W. Gray.

John Leiske was a business visitor
in Carbon on Tuesday.

Messrs. F. Bessant, R. J. Fairbairn,
A. F. McKibbin, M. Sember, C. B.
Oakley, D. Code, W. A. Braisher and
R. H. Purdy of Carbon Lodge No. 107,
A.F. & A.M. returned Friday from a
two-day convention of the Masonic
Lodge at Lethbridge.

C. C. Turcotte is building a veranda
in front of the telephone office.

Miss Freda Ruff left for her home
in Delta on Saturday evening

Miss Mildred Sorbee also left for
her home in Drumheller on Saturday
last. Miss Lottie McEwan has taken
her position in the telephone office as
night operator.

Mr. and Mrs. C. Knisley and son
left on Sunday for a six-weeks auto
tour to Kansas City.

W. A. Braisher was a Calgary visitor
on Tuesday.

Miss Annabelle Ramsay returned to
Calgary on Monday and will resume
her studies at the Garbutt Business
College.

Mrs. Morrison and son, who have
been visiting with Mrs. Morrison's
parents, Mr. and Mrs. J. E. James,
left on Sunday for Mirror, Alta. They
were accompanied by Roy James.

J. A. MacDonald was a visitor to
Medicine Hat over the week end.

Miss Vera Poxon came out from
Calgary on Monday to attend the fun-
eral of Phyllis Heath.

Mrs. Lilja left on Sunday for Rumsey
where she has secured a position in
the telephone office.

With the present dry spell the trees
that were put in around town by the
Village and the Carbon Elks, need a
considerable amount of water if they
are to live. It is the duty of every cit-
izen to see that the trees along his
or her property are frequently water-
ed. If you have not done this in the
past now is the time to start, and do
not wait for your neighbor to begin.
He may not like the cost of watering
his trees added to his taxes at the
end of the year any better than you
do.

One of those quick blondes of Broad-
way was seated in a side street cafe
when her escort asked if she would
like a drink.

"Sure," she chirped.

"Waiter," said the escort, "bring the
lady a glass of water."

"I'm thirsty, not doity," was the
quick retort.

PHYLLIS HEATH LAID TO REST

Word was received Saturday after-
noon that Phyllis Heath, 5-year old
daughter of Mr. and Mrs. R. Heath,
Carbon, had died in the Holy Cross
Hospital that morning. The deceased
was taken with convulsions Friday
and was taken to Calgary Saturday
morning when it was learned that she

was suffering from Spinal Meningitis
and she died shortly afterwards. The
body was brought to Carbon Monday
evening and funeral services were
held Tuesday afternoon, the Rev. C.
B. Oakley officiating. The pallbearers
were: Norman Nash, Sam Poxon, Har-
ry Poxon and Billy Peters.

Interment was made in the Carbon
cemetery.

WORLD HAPPENINGS BRIEFLY TOLD

Newfoundland's recently authorized \$6,000,000 five per cent. loan was awarded to the Bank of Montreal on a bid of 96.25. The government regarded the terms as favorable.

Prince Charles, second son of King Albert, was fined 100 francs (about \$4), for not voting in the Belgian provincial election in accordance with Belgian law.

Caught between a conveyor and a mixer in the Flin Flon mine plant, Jacob Holt was dragged to his death. His clothing became caught in the bucket carrying device when he was working about the machine.

Some early moves looking to reduction of international naval armament are confidently expected in informed circles at Washington, to be made by the United States and Great Britain.

The Ontario Government's agreement with the Federal government on old age pensions was formally signed by Premier G. Howard Ferguson, and Hon. Peter Heenan, federal minister of labor. The act becomes operative November 1.

One of the largest diamonds found in the South African fields was recently brought to Kimberley from Barkley West for valuation. It weighed thirty-three and one quarter carats and sold for \$13,300. This is believed to be a record price per carat—\$400.

Baking tests of Garnet wheat, shortly are to be carried out in the United Kingdom, and will be observed by L. H. Newman, Dominion cerealist, who leaves from Montreal, on the Montrose. Mr. Newman may also go to Hamburg and other European grain markets.

The use of Miller's Worm Powders insures healthy children so far as the ailments attributable to worms are concerned. A high mortality among children is traceable to worms. These sap the strength of infants so that they are unable to maintain the battle for life and succumb to weakness. This preparation gives promise of health and keeps it.

New Yorks Are Common

Americans may believe there is only one New York, but England has three and Scotland one. England recently claimed a New York in Kent, Lincolnshire and Northumberland counties and immediately all good Scotchmen pointed to their New York on the western shores of Loch Awe.

Use Minard's for the rub down.

Most Obedient

Mamma: "And were you a nice boy at the party?"

Bobby: "Yes mamma."

Mamma: "You didn't ask twice for anything at the table, did you?"

Bobby: "No, I didn't, I asked once, and they didn't hear me, so I just helped myself."

Cramps Diarrhoea Pains in Stomach

Mr. Roy Lighthall, Milford, Ont., writes: "I became very ill; lost my appetite, had cramps, diarrhoea, and severe pains in my stomach."

"I purchased a bottle of and before I had taken half of it I was completely relieved, and have had no symptoms of the trouble since."

"I cannot praise 'The Extract' too highly, and will never be without a bottle of it in the house."

"It is pleasant to take and acts very quickly."

"My brother had the same experience with it as I had."

"Dr. Fowler's" has been on the market for the past 84 years; you don't experiment when you buy it. Price 50 cents a bottle at all dealers; put up only by The T. Milburn Co., Ltd., Toronto, Ont."

Channel Tunnel Plan Favored

Would Help To Solve Unemployment Problem In Britain

Construction of a tunnel under the English Channel to connect England and France by rail is one of the schemes which Rt. Hon. J. H. Thomas has his eye on in connection with his plans to solve the British unemployment problem. Mr. Thomas has been delegated by the new premier Rt. Hon. J. Ramsay MacDonald, to direct the new Labor government's work in dealing with the unemployment situation.

He is organizing a new government department of employment and is obtaining reports on a number of projects which might supply work for some of the men now unemployed as a preliminary to calling in experts from all the government departments.

With the aid of the experts he hopes to frame definite plans for road-building, housing development and railway reconstruction. At the same time he is not to forget emigration and the development of the Empire and the part they may be made to play in reducing the army of unemployed.

A Famous Field-Marshal

Viscount Allenby Has Had Distinguished Career As Soldier and Statesman

Field-Marshal Viscount Allenby celebrated his 68th birthday recently. He has displayed marked and outstanding ability in two fields—soldiering and statesmanship. At the outbreak of the Great War he assumed command of the Cavalry Division with the Expeditionary Force, and afterwards won undying fame as the conqueror of Jerusalem. Then as High Commissioner of Egypt in 1924 his firm attitude after the assassination of the Sirdar undoubtedly prevented a very ugly situation developing into positive disaster. His is a temperament which the Orient understands and appreciated. On the Western Front he was known as "The Bull."

Phosphates For Fertilizers

Manufacture Of Fertilizers On a Large Scale To Be Carried On In B.C.

The vast deposits of phosphates in British Columbia, to be converted into fertilizer by the Consolidated Mining and Smelting Company, will save the "wheat sick" parts of the grain belt in Western Canada, said C. C. Castle, of Victoria, formerly member of the Canadian Grain Commission, the other day. "The ally," he said, "The manufacture of fertilizer on a large scale will be the greatest salvation the western provinces have ever known. It will cause an increased yield; an earlier harvest, closer settlement and bring a reduction of taxation."

For Burns and Scalds. Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

Products Of Canada's Farms

The four leading items in the total agricultural production of Canada in 1928, valued in all at \$1,730,304,000 are: Field crops, \$1,099,781,000; dairy products, \$250,000,000; farm animals, \$197,880,000; and poultry and eggs, \$106,654,000. Last year was the first year for poultry and eggs to exceed \$100,000,000 in value. Since 1923 these have increased in value from \$62,000,000. Value of farm animals in five years has advanced \$72,000,000.

Corns are caused by the pressure of tight boots, but no one need be troubled with them long when so simple a remedy as Holloway's Corn Remover is available.

A Large Order

Mrs. Highty-Tighty: "And these are all the vacuum cleaners you have?"

Dealer: "Yes, madam, I have shown you all we carry."

Mrs. Highty-Tighty: "Well, I'm afraid they won't suit. I want one from the Louis XV. period to match my antiques."

Keep Minard's in the Medicine chest.

Ambitious Project

Plan To Pipe Gas From Alberta As Far East As Winnipeg

W. S. Herron, oil operator, announces that a plan for piping gas from Alberta to Winnipeg, serving also Regina, Moose Jaw and Saskatoon, is under consideration. He says that the cost would probably be \$50,000,000 and that eastern Canadian and N.Y. capital is interested.

WHEN BABY IS WELL MOTHER IS HAPPY

The happy mother is the one whose baby is well—it is the laughing gurgling baby who always brings joy to the home. When baby is ill everyone in the home suffers—not only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers are happy mothers because they have found the way to keep their little ones well—or if sickness does come on suddenly, as it usually does with little ones, they have found the way to speedily bring the baby back to health again. Mrs. George Kech, Lindberg, Alta., is one of these mothers, and she writes as follows:—"I am the happy mother of a seventeen-month-old baby girl. Baby is healthy and strong and sleeps well at night. I give her no other medicine but Baby's Own Tablets, and she just loves them. I am never without the Tablets in the house."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels; sweeten the stomach and thus drive out constipation and indigestion and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Offered High Position

Clarence Chamberlain, trans-Atlantic flyer, wants a young woman secretary who will do her stenographic stuff in the air. He is willing to "iron out" the bumps and make the work as pleasant as possible. His frequent and long-distance flights, he says, necessitates the engagement of an air secretary.

SUNDAY SCHOOL LESSON

JUNE 23

PSALM OF PRAISE

Golden Text: "Bless Jehovah, O my soul."—Psalm 103.1.

Lesson: Psalm 103.1-22.

Devotional Reading: Psalm 107. 23-31.

Explanations and Comments

Gratitude and Praise For God's Mercies, verses 1-5.—"Bless Jehovah, O my soul"; thus the Psalmist addresses himself. "The Semitic languages have no word for 'self.' If the Syriac has to render 'a kingdom divided against itself,' it says 'a kingdom divided against its soul.' If it has to render 'yourselves' it must needs say 'your souls.' And all that is within me—my whole self, my whole being, all my faculties and powers—bless His holy name. As we have often noted, 'name' stands for person; bless Him who is holy.

"It takes all there is of a man to praise and worship God adequately. Half-hearted praise is quite as much out of place as half-hearted devotion to one's family or country."

Bless Jehovah, O my soul, and forget not all his benefits. Forget none of them; take none of them for granted. How often is forgetfulness the cause of ingratitude!

"I believe thanksgiving to be a greater mark of holiness than any other part of worship."—McLeod.

In the two clauses of verse 3 and the first clause of verse 4, Professor Drummond notes in the last part of each, three facts of similarity—the guilt of sin, the stain of sin, and the power of sin; and in the first part of each, three facts of salvation—forgiveness, healing, and redemption. Who forgetteth all thine iniquities, thy crookedness, thy sin! Who healeth all thy diseases.

"Is not the recuperative power of nature God's own healing touch? Had He not endowed our bodies with that which restores them from accident and sickness, no bone would ever set, no wound ever close, no patient ever recover. And so it is with the deeper maladies of the soul."—W. L. Watkinson.

Who redeemeth thy life (thyself), from destruction. Destruction, or the pit, Revised Version. "It stands for Sheol, which is here pictured as claiming the Psalmist when on the point of dying; but Jehovah paid, as it were, the ransom and so brought him back to health and life. 'Redeem' or 'ransom,' is here used figuratively."—T. W. Davies. Who crowneth thee with lovingkindness and tender mercies.

"God's goodness is not like the barometer—sometimes high, sometimes low, sometimes doubtful. It is the constant quality on which we can ever rely."

Sambo: "What an dis yeah millenium that Oh don' heah folks talkin' about?"

Rastus: "Yoh sho is ignorant, boy, yoh sho is. Why, a millenium am just de same ez a centennial, only it don hab mo' laigs."

"Talkie" Novels Now

People Can Enjoy Book Without Trouble Of Reading It

Talkie novels have come as the natural sequence to talkie movies.

The first talkie novel is a story "Artaban," by Andre Cayatte, and has been put up in a series of phonograph records, each record containing a chapter. The story is related by the author.

Several others are in preparation, but the plan has been changed by using men and women to recite the lines of the characters of the novel, to do away with "says she" and "says he."

Editors of the talkie novels predict a great future, principally because it will now be possible to enjoy a book without even the effort of turning every page.

"Nurse," said an amorous patient, "I'm in love with you. I don't want to get well."

"Cheer up, you won't," she assured him. "The doctor's in love with me, too, and he saw you kiss me this morning."

WINDOLITE

The Improved
Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Good

Blue Ribbon Tea

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

The Desert Song

—BY—

VIRGINIA MORRIS

Copyright 1929 Warner Bros. Pictures, Inc.

"The Desert Song" is a Warner Bros. picture. It is based upon the story by Otto Harbach, Laurence Schwab, Oscar Hammerstein, 2nd, and Frank Mandel.

CHAPTER V.—Continued.

An hour later the Red Shadow received from his host the advice that the French girl was alone in the upper chamber. He found this room to be a gorgeous apartment lighted by great oriental lamps that burned live coals and suffused a weird effect. Margot was sitting on a low silk couch. Her dusty riding habit had been exchanged for a flimsy chiffon skirt that revealed every line of her alluring body. A narrow pearl bodice took the place of a waist and her bare arms were braceleted with broad bands of precious stones. She was far more beautiful in eastern garb than the Red Shadow had ever seen her before.

"Why did you bring me here?" was Margot's first question when the Red Shadow entered. She arose from the couch and stood in a defiant attitude.

"Why?" he replied. "To teach you to love me—so fiercely that you could give up home and friends. Call it a mad dream, but mad as it is I'm willing to risk my whole future to make it come true!"

"Leave love out of it," she answered. "I hate you! I love Paul!"

But the Red Shadow knew better. With a final positiveness, he told her, "You do not love him! Come to me!"

His persuasiveness had not won her, for she shrank from him. "Tell me one good reason why you will not," he insisted.

"Why there . . . there are many!"

"Give me one!"

"Why I love . . . I love Pierre Birabeau. I know that I do. Once I dreamed of romance and adventure, but I've had enough of it. I want the quiet life that Pierre planned for me!"

The Red Shadow made an impulsive

"HELPED ME WONDERFULLY"

Woman Strengthened by Taking Lydia E. Pinkham's Vegetable Compound

Port Colborne, Ont.—"After having an operation, I was very miserable, weak, nervous and very near unfit to work. I saw Lydia E. Pinkham's Vegetable Compound advertised and tried it and believe it helped me wonderfully. I have no weak spells any more, the pains have left me and my nerves are much better. I feel safe now."

In saying Lydia E. Pinkham's medicines have helped me wonderfully.—Mrs. Wm. H. Beechler, Box 143, Port Colborne, Ont.

W. N. U. 1790

sive attempt to take her in his arms, but before he could do so the door burst open and Ali Ben Ali entered—followed by General Birabeau!

The Sheik motioned to them, "Believe me, I wish to prove myself a friend of the French. You see my people are innocent. He stole her . . . I know nothing!"

The Riffs along with Ali Ben Ali's men, now crowded into the room. General Birabeau turned to the owner of the desert palace. "Sir, Azuri guided me here," he explained. "I've come alone—and I want to take this girl back with me!"

Birabeau walked directly to the masked leader of the Riffs.

"Azuri tells me that you've boasted that no man can beat you in single combat. Well, I am going to kill you or you will have to kill me!"

For the first time the Riffs saw the Red Shadow turn pale and shrink back from a challenge. Without explanation he ignored the insult of the Frenchman. Even Birabeau was aghast with astonishment.

Ali Ben Ali, who knew the ruthless code of the desert, warned the masked man. "What has come over you, friend? Your own followers will send you out in the wilderness to die if you do not fight!"

Still the Red Shadow made no attempt to defend his honor. General Birabeau, nevertheless, would not let the outlaw evade him.

"So this is the famous Red Shadow?" he sneered. "The myth that has frightened all Morocco! I think you're a coward!"

Margot ran between the two men.

"Please don't, General!" she begged.

But the commandant pushed her aside roughly. Then reaching in his belt, he drew out his glove and struck the Red Shadow in the face!

CHAPTER VI.

A dreary day passed for Margot. She was back at the garrison in Fez but she knew that the total happiness of life had been left back there in Ali Ben Ali's palace. Her dream of romance was all but fulfilled and yet she herself had been the one to reject it. Her desert love had told her what no other man had ever said—that he was willing to risk his whole future to have her as his own. The contempt with which she had treated him now made her heart ache.

Although Ali Ben Ali had granted General Birabeau, Bennie, Susan and herself safe conduct back to Fez, she had heard the dreadful fate that the Riffs had meted out to the Red Shadow. The law of their tribe had left them no choice. Their leader had allowed an enemy to dishonor him and there was the inevitable punishment that Allah had ordained. The disgraced one was sent out into the desert alone, without food, without water, with no weapon of defence but his broken sword. And those men who had been his loyal soldiers, those men who had loved him as a blood brother, stood watching silently until he had disappeared over the crest of the farthest hill. Later they would choose a new leader but now they turned their faces toward Mecca and prayed.

For hours Margot had stared into the hot sandy wastes. Not even Pierre was there to distract her with his chatter, for the night the Red Shadow had kidnapped her he had taken a boat for Tangiers. The thought of Pierre puzzled her. Al-

though she felt herself madly infatuated with the outlaw, she believed that sincerity had prompted her to tell him she longed for the safety that life with Pierre would mean. Her heart was a maze of contradictions but, after all, nothing could matter much now.

She did not hear Captain Paul Fontaine enter. He startled her when he sat on the arm of her chair and tried to take her hand.

"Please, don't, Paul," she protested wearily.

Fontaine's face flushed with jealousy. "I know why you're not happy. It's because the Red Shadow is in danger. You've fallen in love with him."

Margot turned her head and looked at him defiantly. "What if I have?"

Their quarrel was interrupted by the arrival of General Birabeau. "Paul, the command to take the Red Shadow a prisoner is changed. He is not to be brought in alive!"

Fontaine smiled but Margot jumped to her feet and exclaimed, "But the man you're after is alone and unarmed! You cannot be cowards enough to kill him!"

"Go, Paul, you have heard my orders!" insisted the General. But he was not devoid of sympathy for the girl, for as his subordinate left, he turned to her: "Margot, I advise you to give up this dream of romance. It has caused you enough heartache."

Thinking it was kinder to leave her alone, he disappeared silently to the garden. The girl resumed her vigil, scanning the desert spaces she knew not for what. Afternoon darkened to dusk and dusk darkened to evening. Then, out of the stillness, cries of the returning soldiers were heard. A moment later Captain Fontaine burst into the room and the instant that Margot saw his face she knew that his mission had been successful. He was followed by General Birabeau, who asked, "Tell me what happened?"

"We killed him!"

"Who? Which one of the soldiers?" the commandant enquired.

Paul Fontaine hesitated. "None of our soldiers. But the last man you would ever suspect."

The door opened and Pierre Birabeau stood before them. Over his arm was the cloak and the mask of the Red Shadow and his hand held the outlaw's broken sword. Gradually his father realized the daring of the son he had almost despised. It was he who had killed the dreaded enemy. In a rush of emotion he put his arms around the boy and held him close. Then another realization slowly possessed him, for he whispered so that only Pierre could hear, "You were bravest when you refused to fight!"

That evening Pierre Birabeau was the acknowledged hero of the post. Margot alone failed to congratulate him. The General, bursting with pride, at the bravery of his own boy, urged him to tell the girl the details of his amazing exploit. As he left the room he saw Pierre put his arm around Margot Bonvalet—and he had never dared that before!

"Margot—" Pierre began.

"Please, Pierre—don't tell me anything more. I—I want to be left alone."

"But answer just one question, Margot, and then I will go. Did you love this man very much?"

There were tears in the girl's eyes.

"Yes, I loved him—as I never will love anyone else."

Pierre did as he had promised. He went quietly from the room. When she knew that she was alone Margot gave way to all the despair that had been stifling her since the night before, since she started back over the desert, leaving the Red Shadow to face the horrible punishment he could not escape. Her own sobs prevented her hearing the door through which Pierre went open again. She felt a hand on her shoulder. At first it seemed impossible—it was the distorted imagining of her broken heart. But when she felt his lips against hers she knew that it was true. The Red Shadow—her lover—was there, dressed in his scarlet burnoose, his face hidden by the mask he had always worn.

Then, after that long embrace, she lifted the mask. And she knew that the greatest romance of all was ahead—the tempestuous love of the Red Shadow and the protecting tenderness of Pierre.

THE END

Interesting Relics Found

Discovery Made At Old Settlement On Saskatchewan River

A discovery of great prehistoric interest has been made at Brosseau, an old settlement on the north bank of the Saskatchewan River, near Spedden, the discovery consisting of a large quantity of articles of warfare and household use.

A short time ago, as John Ames was plowing on his farm at Brosseau, the sound of steel against steel attracted his attention. On investigating he discovered a barrel shaped cavity filled with axes of many patterns, tomahawks, big hunting knives, table knives and forks, flints, arrowheads, locks, keys, etc.

The locks are of the type known as stock locks, and these and the keys are of enormous size compared with the modern kind. Many theories are afloat as to the reason for burying these articles in this remote place. Many years, perhaps generations, must have elapsed since this miscellaneous collection of articles were hidden away. That they were enclosed in a barrel is quite evident from the shape of the hole and from the fact that though the wooden staves have long since turned into dust, some of the iron hoops, rusted and worn, still remain. A few theories in connection with this remarkable find are: That the articles were being conveyed to a Hudson Bay post, when owing to some accident or disaster, the factor or men in charge of them had to cache them in this spot; or that they may have been taken from the post at Frog Lake, at the time of what is called the Massacre, by Indians, who fearing pursuit, buried them where they were found.

Little Helps For This Week

"He giveth power to the faint, and to them that have no might He increaseth strength."—Isaiah xl. 29.

It is not, Lord, that I have fearful grown
To walk the way I must;
But oh! the path is steep that I must tread,
And often in the dust.

I fall, my feet are bleeding from the stones,
And all my tears are vain;
Forgive, I pray, dear Lord, and give me strength;
Thy strength to rise again.

Whether we stumble, or whether we fall, we must only think of rising again and going on in our course. God never makes us feel our weakness, but that we may be led to seek strength from Him.—Fenelon.

It is impossible for that man to despair who remembers that his Helper is omnipotent.—Jeremy Taylor.

Firestone TIRES

FIRESTONE Tires are the outstanding choice of those who demand the greatest safety for high speeds, rugged endurance and utmost economy. Gum-Dipping, the extra Firestone process, combined with the Firestone Safety Thread, makes these tires the toughest, longest-wearing tires on earth.

Mathematical Genius

Six Year Old Danish Boy Has Dismayed Scientists

Danish scientists have been dumfounded by the mental antics of a six-year-old mathematical genius. Paul Larsen, whose father is a modest tailor in the village of Hviðovre. On a recent visit to Copenhagen the chubby little fellow multiplied figures with products as high as 10,000. Most of his answers were given in less than ten seconds, and if the calculations of his inquisitors may be relied upon, all of them were accurate. According to his proud father, Paul has displayed his ability at arithmetic since he passed his fourth birthday, and no one has ever taken particular pains to train his mind in that direction. When he is not performing for curious visitors, the child spends his time playing about the streets of his native village.

So Many Home Uses!

Keep foods fresh longer by covering them with Para-Sani.

Use Para-Sani to keep food & lunch tins fresh.

Keep the freshness in sandwiches prepared for the party with a covering of Para-Sani.

YOU'LL FIND A Hundred vital, saving uses for Para-Sani Heavy Waxed Paper in your home. Comes in handy, sanitary, knife-edged package. For less exacting uses: "Centre Pull" Waxed Tissue (flat sheets). At grocers, druggists, stationers.

IF I COULDN'T BOOST I'D MOVE

A town that is good enough to live
in, good enough to provide your liveli-
hood, provide your children with
schools and playgrounds; a town
whose citizens are broadminded enough
to put up with your peculiarities, is a
town good enough for you to boost. If
you can't boost, do the community at
least one favor and move out.

William Hale Thompson, Chicago's
most cursed and discussed mayor, says
—"Throw away your hammer and buy
a horn." That's one thing Mr. Thomp-
son says with which all the thinking
people in his domain are in accord.

It is good advice, however, to sug-
gest that when tooting your horn be
sure you are in the right key.

The man who always knocks and
runs down the place where he lives
is not only a pest but a public habi-
tude. Towns should have a place to
pen such people up—put them all to-
gether in one place and let them con-
tinue only each other. The disease
they have is worse than small pox
and is just as malleous and conta-

gious.

The knocker's creed is—"Whatever
is, is punk."

The easiest thing in the world to
do is knock. It doesn't take any brains
and it is the easiest way to attract
attention.

Knocking is cheap—a cheap trick
used only by cheap people, but ex-
pensive to them in the long run.

If any merchant needs to lose the
patronage of his fellow citizens it's
the fellow who is forever knocking—
who decries and belittles every at-
tempt to do anything for, or make
something of the town—who says that
every fellow or organization that tries
to do things has an axe to grind.

On the other hand the man who
stops blaming conditions, government
prohibition and competition, the man
who quits laying the blame of his
own shortcomings on his associates
and relatives and takes unto himself
the blame for things not being as he
would like to have them—that man
will take advantage of every opportu-
nity to make his town a better place
to live, work, play and make money.

Every town has its faults, but every
town has its good points. If a town
has little to talk about, that is just
that more reason to correct the faults
or at least keep still about them if
a man hasn't enough gumption to do
things that will help correct them.—
EX.

THE CHILD OF FORTUNE

From a western gulch the other day
an old prospector tramped into a live,
bustling city. His beard was long and
gray; his face was tanned by the
mountain sunshine and lined by the
snows of fifty winters. But his eyes
were bright with hope.

"I wouldn't trade that ol' claim o'
mine, back yon, for all the money y'
got in y'r town banks," he said. "I got
millions back there, right from the
grass roots."

Millions? Of course he had millions
there. And he had something more:
the happiness he imagined millions
would buy.

He didn't need the wealth he believ-
ed hidden in his claim. All that he

needed was what he had—the faith
that he was fortunes fair-haired child.
If you have that faith you don't need
money to make you happy.—EX.

PROTECT CAR DRIVERS

In these times when protection is
being so largely stressed, there should
be recognition of the rights of car
drivers. If there is anything that they
should be spared, it is the practise of
irresponsible youths hurling missiles at
passing automobiles.

One frequently sees, during the win-
ter time, children pelting motor cars
with snow balls. And when spring rolls
around then pebbles are cast at cars
as they go by. Not long ago, an Ed-
monton motorist lost the sight of an
eye owing to a boy having hurled a
small stone which broke the wind-
shield, while flying fragments lit in
the driver's face.

Parents of children should impress
upon them the danger of throwing
missiles at motor cars and make every
endeavor to curb a practise that is
fraught with dire possibilities.—Dids-
bury Pioneer.

Two linemen were addicted to the
habit of using very strong language.
While working opposite the residence
of a maiden lady, they shocked her by
using some startling epithets and she
reported them to the company mana-
ger, who investigated the matter and
asked for a statement from the em-

The better half is but a figure of speech.

NASH CAR BURNS ON CALGARY TRAIL LAST WEDNESDAY

A 1926 Nash special sedan was completely destroyed by fire at about ten o'clock last Wednesday evening in the vicinity of Horse Shoe Canyon on the Calgary-Drumheller trail. The car, the property of C. Martin of Drumheller, was being driven back from Carbon by its owner when he suddenly noticed flames breaking through the floorboards under his feet. Mr. Martin shut off the gas and made an effort to put the fire out but the terrific heat prevented him from reaching the base of the flames.

About fifteen minutes after the fire got under way the gasoline tank exploded but fortunately Mr. Martin was a considerable distance away. It is understood that the car was still burning five hours later. The vehicle was covered by insurance.

RAIN NEEDED ALL OVER NORTHERN ALBERTA

The present dry spell is playing havoc with the crops in northern Alberta and if rain does not come soon it looks like a bad year for the farmers. There has been indications of rain many times in the past three weeks but little moisture has resulted. The crops in the Carbon district are beginning to show a little tinge of yellow color, due to lack of moisture, and it will not be long before the fields all take that effect unless we get rain soon. Other districts report the situation far worse than that of the Carbon district and it seems that this dry spell covers most of northern Alberta.

A number of citizens have turned out each night for the past week to

work on the new dam which they are building in the creek so that a swimming pool will be available this year, and great headway has been made and it looks as if we might have a permanent structure after all. Considerable work has been put in these last few days and the volunteer labor has been a great factor in getting in the dam. It is proposed to hold about five feet of water this year and the dam, which is being built of straw, dirt, brush, etc., should hold if a satisfactory spill way is constructed so that the water will be able to run over the top without washing away the dirt.

REGULATIONS FOR VISITING MOTORISTS

After July 1, 1929, any automobile being driven in Alberta with a foreign license plate must carry on its windshield a sticker showing that the car bears a non-resident permit to be operated in this province. These permits which may be secured from the provincial police officials and others who come in contact with the travelling public, will provide a definite record of the number of cars visiting the province each year and the points of origin. The permit when issued is good for three months from the date of issue and must be applied for within days of entrance into the province.

SHEEP POISONED BY DEATH CAMAS

Following reports received from the Jenner and Atlee districts in south-eastern Alberta, Dr. P. R. Tabbot Provincial Veterinarian, recently visited these localities and found that the death of a number of sheep had been caused by their eating a weed known as Death Camas. This weed which grows commonly in a number of districts in the south, has been more prevalent than usual this season owing to climatic conditions. Its effects appear to be more serious when sheep are hot and hungry. The Death Camas belongs to the lily family, grows on sandy soil and is usually found on the slopes of hills facing south, and sheep eating it show the following symptoms: frothing at the mouth, twitching of the muscles and convulsions, followed by death. Shepherds are advised to keep their flocks away from areas where this plant has been discovered.

A very satisfactory antidote in case of poisoning from this weed consists of one dram each of Potassium Permanganate and Aluminum Sulphate dissolved in a pint of water, this quantity being sufficient for about 12 sheep.

WHEAT POOL NOTES

The Alberta Wheat Pool has fixed July 15th as the closing date for the 1928-29 Pool. There are quite a number of Pool farmers who have still a little wheat on hand and they are advised this must be delivered by July 15th, otherwise it will go in with next year's pool.

The Supreme Court of Canada has decided in favor of the Alberta Wheat Pool contention in the H. W. KEAY suit. The Supreme Court judgement sustained the judgement of the Supreme Court of Alberta which was

for arbitration and not for legal action.

According to reports from Ottawa the Federal Government is bringing into effect legislation which will greatly reduce mixing of wheat in terminal elevators. The Wheat Pools have strongly urged that the government should take steps to limit the mixing evil.

Five railway cars were required to move the equipment of the mammoth Cassavant Organ recently installed in the new Royal York Hotel in Toronto. The hotel is the tallest building in the British Empire.

Tyndall stone, which shows to such great effect in the famous Banff Springs Hotel in the Rockies, is to be used in the construction of the new building for the T. Eaton Company in Toronto, the first unit of which is now being built.

The year's champion cattle raiser in British Columbia is Annie Turner, twelve-year-old daughter of James Turner, Cadboro Bay stock breeder. Her 14-month-old short-horn steer, sired by Bradhill Marquis and weighing around 1,100 lbs., won the grand championship of all breeds at the Kamloops bull sale and fat stock show.

Each set of equipment of the Trans-Canada Limited and Mountaineer, and there are eighteen of them, is worth upwards of a million dollars this year, the new rolling stock having added considerably to the value as well as to the attraction of the famous flyer. The C. P. R. Angus Shops at Montreal were busy all winter building special sleeping, dining, and solarium lounge cars for this special de luxe service between Montreal and Vancouver and Chicago and Vancouver.

The Indian of old could wield a wicked tomahawk but to-day he can handle a mean brassie. The pale-face is threatened on the golf links by Indian golfers, and it is likely that at Banff Alberta, the redskins will develop even greater prowess. Indian caddies. It has been decreed, are to be used on the eighteen hole golf course at this famous mountain resort, and the rising generation of Stoney Indian braves are likely to become ardent golf fans.

nal elevators. The Wheat Pools have strongly urged that the government should take steps to limit the mixing evil.

The Canadian Journal of Commerce in a recent issue states: "Despite the large crop of last autumn Wheat Pool members have excellent reasons to be thankful that their crop was not subject to the vagaries of the members of the Chicago and Winnipeg Grain Exchange whose primary object is quite naturally, and under former conditions quite properly, to buy and sell at a profit to themselves."

TOOK SODA 20 YEARS FOR GAS—STOPS NOW

"For 20 years I took soda for indigestion and stomach gas. One bottle of Adlerika brought me complete relief."—John B. Hardy.

Adlerika relieves gas and sour stomach at once. Acting on BOTH upper and lower bowel, it removes old waste matter you never thought was in your system. Let Adlerika give your stomach and bowels a REAL cleaning and see how good you feel! Overcomes constipation. MacK's Drug Store, Carbon.

Hotel Longfellow Built

This hotel, the New Pines at Digby, N.S., was built by Longfellow. Not, however, that he saw it, thought about it or even dreamed or imagined it. What he did do towards it was render immortal the Land of Evangeline, the beautiful Annapolis Valley of which Digby is the gateway, and so create a tourist lure.

The New Pines is being built by the Dominion Atlantic Railway to further aid in the development of tourist traffic in the Maritimes

and, with the exception of the outdoor swimming pool, the lines for which were borrowed from those at Banff and Lake Louise, it is a handsome building of early English type of architecture. The opening of the Pines will shortly precede a three day festival at Annapolis Royal in commemoration of the three-hundredth anniversary of the arrival there of Sir William Alexander's Scottish colonists under the charter of New Scotland granted by King James I.

That old troublesome word "IF"

ONCE UPON A TIME MOST PEOPLE WERE WORRIED A LOT BY "IF." A FEW STILL ARE. YOU CAN TELL THEM IF YOU LISTEN TO THEM WHEN THEY'RE SHOPPING.

"IF YOU ARE SURE THAT RUG WON'T FADE...."

"IF YOU'RE POSITIVE THIS IS PURE WOOL...."

"IF YOU'LL GUARANTEE THESE EGGS ARE FRESH...."

"IF YOU THINK THIS WASHING MACHINE WILL WORK BETTER THAN THE OTHER ONE...."

"IF..... IF..... IF....."

THE TROUBLE WITH SUCH PEOPLE IS—THEY DON'T READ THE ADVERTISEMENTS. PEOPLE WHO DO READ THEM DO NOT HAVE TO DEPEND UPON "IFS" IN THEIR BUYING. THEY KNOW WHAT THEY ARE GETTING, BECAUSE THEY HAVE THE DEFINATE, PRINTED, REITERATED ASSURANCE OF THE ADVERTISER.

MOST PEOPLE NOWADAYS DO READ THE ADVERTISEMENTS. THEY SHOP INTELLIGENTLY AND QUICKLY. THEY KNOW BEFOREHAND WHAT THEY WANT, WHY THEY WANT IT, HOW MUCH THEY WILL HAVE TO PAY, AND WHERE TO GO.

INTELLIGENT BUYERS SUBSTITUTE "KNOW" FOR "IF" BY READING THE ADVERTISEMENTS

Automobile Accidents

The summer months of July and August undoubtedly witness the heaviest automobile traffic throughout Western Canada. It is during this period that tourist traffic is greatest with "foreign" cars in large numbers from other Provinces and the United States crossing and re-crossing these prairies. They come from Provinces and States where traffic regulations frequently are different from those in force in these Western Provinces. During this mid-summer period, too, what we may term "domestic" traffic is at its peak. Roads are at their best, and following the closing of the schools many of our people tour "en famille," while week-end journeyings to summer resorts are much in vogue.

While care in driving is at all times necessary, and with the steady increase in the number of cars in use is becoming a more and more vital matter, it is nevertheless the case that during these summer months extra care should be taken.

There are certain factors to which special attention should be paid, and the importance of which are reinforced as a result of careful investigations into the cause of auto accidents carried out during a period of years. For example, one would naturally suppose that the majority of such accidents occur on bad roads, at intersections, curves, etc., but statistics prove that the majority of accidents occur on the so-called "safe" parts of the highways. Apparently drivers are careful on curves and badly surfaced roads, and let themselves go on straight, smooth stretches.

Statistics compiled in the State of Iowa in regard to accidents are certainly illuminating:

10,666 accidents occurred on straight-away stretches where the drivers of the colliding cars had a clear view of the objects with which they were colliding.

7,395 occurred at intersecting roads, most of which were due to the fact that one or both vehicles approached the intersections at speeds too great to be checked upon perceiving the approach of the second car.

3,566 were caused by failure to grant the right-of-way at street crossings.

940 occurred on curves, caused by the drivers of the two vehicles going in opposite directions "hugging" the "inside" of the bend in the road to help them maintain high speed.

1,169 resulted from driving on the wrong side of the road.

117 were caused by cutting corners.

1,788 were caused while ascending and descending hills.

The roads were in the following conditions:

15,000 roads were good; 593 were rough; 3,196 were wet; 483 were covered with snow; 1,018 were icy; 186 were sandy; 51 were muddy.

These figures seem to fairly establish the fact that the better the roads, the greater the number of accidents. In other words, where roads are not good, drivers are forced to exercise care, and because care is exercised accidents are reduced to a minimum notwithstanding that conditions existing would naturally predispose accidents, but where roads are good, drivers become careless, even reckless, and, sooner or later, the inevitable result is an accident.

With the present insistent demand everywhere for more good roads, and a still higher standard of good roads, coupled with the increasing power of cars and their enormous increase in number, the accident toll on highways is mounting higher and higher. The cause is the very reverse of what might have been expected. It is not defects in car manufacture, because cars themselves are stronger than ever before. It is not road conditions which presumably might ditch a car, overturn or damage it.

No, it is the human element that is responsible for the mounting toll of accidents. Instead of reaping the benefit of the vast improvements being made, drivers are becoming more and more careless, taking ever greater chances, becoming less considerate of the other fellow's rights, determined to secure "speed" at all hazards.

Think it over the next time you are tempted to "step on the gas for the sole purpose of seeing and boasting of what your car can do. It may do something you least desire and will forever regret.

Busy At Eighty-Two

At the death at 82, of Mrs. Flora Annie Steel, the great novelist of India, at Springfield, England, recently, she had just finished her autobiography, had half finished another, and had just published another, "The Curse Of Eve," which gave her views on social problems.

Bicycles More Popular

Production of bicycles in Canada reached a new high level in 1928 at \$2,213,493. This was 52 per cent. above the previous record, that of 1926, of \$1,453,658, and 85 per cent. better than the \$1,194,471 reported for 1927. Three firms, all in Ontario, furnished the entire output.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore..

Work On Branch Line To Mine

Commence Laying Steel On Line To Sherritt-Gordon Property

Commencement has been made on the laying of steel on the branch from Cranberry Portage to Sherritt-Gordon.

According to information, a very large gang under Peter MacKenzie, started laying the rails on the 55 1/2 mile stretch. Work will be rushed on the steel laying and it is anticipated that trains will be running into Cold Lake by September 1st.

The opening up of the Cold Lake branch will see active development on many mining properties lying between Cranberry and Cold Lake.

NERVE TORTURES

A Condition From Which Both Men and Women Suffer

Hardly any condition of ill health causes more real suffering than a shattered nervous system. And often, unfortunately, but little sympathy is shown for the sufferer, from the mistaken notion that the nerves can be controlled. Men and women with nerves out of gear often become irritable and are blamed for ill temper, when it is not their fault. Their poor health is the cause. The tired, over-busy wife and mother, whose household cares have worn her thin; the breadwinner whose anxieties have worried him until he is really ill, are among the nerve sufferers who become run-down. Their nerves, like all bodily organs, need rich, red blood. In all such cases the best and simplest treatment is a course of Dr. Williams' Pink Pills, which enriches the blood and builds up the nervous system and brings good health and cheerfulness. Mrs. M. Cross, Richmond, Que., tells how this medicine ended her nervous troubles. She says—"I have suffered from nervousness and dizzy spells, and the hundred and one things which in such a condition make life a misery. The first thing I found to help me was Dr. Williams' Pink Pills. Under the use of this medicine I found my nerves grew steadier, the dizzy spells grew less frequent, and I became brighter and more cheerful. I took the pills for some time and found that they enrich the blood, build up the nerves and are a fine medicine for both old and young."

You can get these pills through any medicine dealer or by mail at 50c, a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Cars For Bolsheviks

Stated That Henry Ford Will Produce 900,000 Autos For Soviets

Henry Ford is to produce 100,000 cars a year for Soviet Russia under terms of a contract signed recently and made public in New York.

The contract will run for nine years and the factory will be established in Russia. Only the Ford passenger model "A" and the Ford truck model "AA" will be manufactured. More trucks than passenger cars will be produced.

The factory is to be located at Nizhni Novgorod, on the Volga river, and will be completed within four years.

After 10 Years Of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is earning it today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

Better Study Geography

The Saskatoon Star-Phoenix received a letter from the assistant editor of the National Geographic Magazine, Washington, D.C., in which reference was made throughout to "Saskatoon, British Columbia." If all the other information published in National Geographic is equally as accurate as the above, it is no cause for wonder that the Americans picture Canada only as a land of igloos and England as a country of beer mugs and plus-fours.

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Exterminator.

It is complained that many business men write illegibly. A really busy man, of course, has not time to be constantly consulting a dictionary.

For sunburn—apply Minard's Lintment.

W. N. U. 1790

New Picture Film Invented

Can Be Made Of Cloth and Is Washable

The housewife of the near future may say to her servant:

"Bridget, put those photos of father in the wash and hang them on the line to dry. Be sure to iron them tomorrow, for he is coming on a visit and I want them to look nice and fresh."

Exactly that can be done with a new kind of picture film invented by Dr. R. W. Hochstetter, head of the Hochstetter laboratories.

He is not using the invention for household purposes, but instead is applying it to produce new types of sound picture films, and radio transmission of sound, photos and motion pictures. Several new processes are involved.

The first is making photographic film out of cloth, so that it is washable, ironable and non-inflammable. He says that cotton, silk, linen or even paper can be used.

Along with the new film Dr. Hochstetter announces invention of a process for reflecting sound and pictures from the face of the films, instead of transmitting light through film. He also has a different method of amplification of sound, to get further away from distortion.

Machinery For Shearing

Hand Clippers Used In Australia Only On Pedigree Sheep

Australia's wool clip this season is estimated at about 900,000,000 lbs. from about 100,000,000 sheep. The great bulk of the shearing is done by machinery, although, in the case of pedigree sheep, hand-clippers are generally used to ensure a cleaner and more even cut. Wolseley, who invented the shearing machine, went to Australia from England in the middle of last century. He took up sheep farming soon after his arrival, and brought his first patent in 1874. With the machine shears now in use, an average worker can cut 100 fleeces per day, and totals up to 200 are fairly common.

Five Points For Britain

Has Designed, Equipped and Operated Fastest Modes Of Travel

It is certainly a most remarkable fact that at this moment the fastest aircraft in the world (the seaplane which won the Schneider Cup), the fastest craft on water (Miss England), the fastest motor car (the Golden Arrow), the fastest passenger liner (the Mauretania), and the fastest locomotive (a G. W. R. Express), are British all five—British designed, equipped, and operated. We are glad that the British government's exhibit at the Toronto National Exhibition this year will show five models to remind the world of it.

For Frost Bites and Chilblains. — Chilblains come from undue exposure to slush and cold and frost-bite from the icy winds of winter. In the treatment of either an excellent preparation is Dr. Thomas' Electric Oil, as it counteracts the inflammation and relieves the pain. The action of the oil is prompt and its application is extremely simple.

Mapping By Photography

The camera has been used by the Topographical Survey, Department of the Interior, as a means of gathering topographical data in the field for mapping purposes, for the last forty years.

Minard's Liniment for sick animals.

The amusing part of it, says the Farmer's Advocate, is that some of those city fellows who know how a farm ought to be run, plant a bag of potatoes and harvest a bushel.

6 Suggestions

Make Your Farm More Comfortable, More Livable and More Profitable with These Simple Spare-time Improvements

If you have any time on your hands here are six suggestions which will make an amazing difference in the attractiveness and efficiency of your farm.

Third—Line your garage with Gyproc. Gyproc will make it fire-proof, cold resistant and a safer, more substantial home for your car.

First—Buy a supply of Gyproc Fireproof Wallboard. Then erect Gyproc partitions in your attic, changing the waste space into an additional room or two. Imagine how much more comfortable the family will be with the attic converted into a clean, inviting third story.

Second—Renovate the lower rooms by nailing Gyproc right over cracked and faded walls. You can decorate the flat, smooth Gyproc surfaces with Alabastine, paint or any other finish. And what a difference it will make to your home.

Sixth—Look about for cracked, warped or rotted walls, partitions and ceilings and repair with Gyproc. Such repairs are quick and inexpensive to make because Gyproc saws, nails and cuts so easily—saving time and labor.

MANITOBA MAY ACCEPT TERMS ON RESOURCES

Ottawa.—Terminating a political issue which has disturbed both provincial and federal politics for more than 40 years, the report of the Manitoba natural resources commission was tabled in parliament recently.

In brief, the report which consists of 46 printed pages, recommends:

(1)—The payment in cash by the Dominion to Manitoba of \$4,584,212.49, as the balance due for past arrears.

(2)—The payment to Manitoba of \$562,500 annually, from now on, until the population of the province reaches 800,000.

(3)—Increase in this annual payment of \$750,000 when the population of Manitoba reaches 800,000.

(4)—Finally, when the population attains the figure of 1,200,000 an increase in the amount payable annually to Manitoba to \$1,125,000. This amount is to remain unchanged thereafter.

(5)—The wiping out hereafter of an amount of \$153,492.82 which has been deducted annually from the subsidy, being the interest on the monies received by the province from the sale of swamp lands, when these lands were under provincial control, and the capital sum set as the value of the 150,000 acres of land granted as an endowment to the University of Manitoba. Hereafter, this sum will not be deducted from the subsidy.

It is understood here that both the province and the Dominion have agreed to accept the recommendations of the commission, and that legislation implementing these recommendations will be introduced in parliament early in the season of 1930.

The probable effect of the report on the natural resources question as it affects Saskatchewan and Alberta was being canvassed here by the members of parliament. In regard to the payment of the subsidies with statutory increases in perpetuity, it was considered that the report would greatly assist the other two provinces to obtain such a settlement.

May Visit U.S. In July

Premier Ramsay MacDonald To Make Goodwill Visit This Summer

London, Eng.—Premier Ramsay MacDonald will pay his contemplated visit to the United States as soon as parliament has risen at the end of July, unless an adverse reason should suddenly intervene, it was generally held in authoritative quarters here. Departure at this time would leave him free for his projected visit in September to the League of Nations assembly meeting at Geneva. The understanding is Premier MacKenzie King would represent Canada if such an Anglo-American conference is held at Washington.

"I cannot make a statement of any kind tonight," Mr. MacDonald declared as he was leaving London with his daughter, Isobel, for his home in Looismouth.

The premier explained he was going to Looismouth in search of rest and he expected to return again before the opening of parliament, on June 25.

Famous Wheat Men Ill

Winnipeg.—Two internationally famous wheat breeders are ill in Winnipeg while attending the Canadian Seed Convention here. They are Herman Trelle, Peace River, Alta. producer of prize winning exhibits, both in Canada and United States, and S. Larcombe, of Birtle, Man., also a successful grain exhibitor. A nervous breakdown was given as the cause of Mr. Trelle's illness. He is in the hospital.

Urges Muskrat Farming

Ottawa.—Steps for the development of the muskrat industry were advocated in the House of Commons by M. N. Campbell (Prog. MacKenzie). Muskrats could be raised very easily in the west on damp pieces of farm land, and government assistance by way of technical advice might be very valuable.

W. N. U. 1790

Arrange Direct Express Service From Europe

New Agreement Will Ensure Quick Despatch Of Parcels

Montreal, Que.—Arrangements have been completed between the "Compagnie Internationale Des Wagons-Lits et des Grande Express Europeennes" and the Canadian Pacific Express Company for a direct express service from all European countries to Canada according to information received at Canadian Pacific express offices.

Parcels handed in at any of the offices of the Compagnie Internationale throughout Europe will be forwarded direct by the famous crack trains of that company to points where the Canadian Pacific Express maintain receiving offices, whence they will come to this country on Canadian Pacific steamers.

Sending parcels to Canada has always been a somewhat hazardous business, at any rate from remote points in Europe where no adequate local express service is in operation. By virtue of the new agreement entered into by the two companies it will now be as safe and quick as sending a parcel from one's Canadian city to another.

Will Collect Oil Royalties

Government Will Put Regulation Into Effect Next January

Ottawa.—The regulation enabling the government to collect royalties on oil produced on Dominion Crown lands leased to private companies will be put into effect on January 1, Hon. Charles Stewart, minister of the interior, told the House in committee. The regulation which was passed some years ago, but has never been put into effect, provides that after a company has been producing oil for five years, a royalty not less than 2½ per cent. and not exceeding five per cent. of the output, or five per cent. of the sales of the product of the locality at the discretion of the minister shall be collected.

New Grain Board

A Board Composed Of Younger Men To Be Appointed Soon

Ottawa.—The cabinet is now considering the appointment of a new board of grain commissioners. The members of the old board, it is understood, are to be retired, and a board composed of younger men is to take their places.

The only appointment seriously considered so far is that of a successor to Leslie Boyd, the chairman of the board, and, undoubtedly, this position will be offered to Mr. Justice Turgeon, of Saskatchewan. It is thought here, however, that he will decline to accept. In this event, it is not improbable that the post will be offered to Hon. Charles Stewart, minister of the interior.

Suggests Earlier Sessions

Ottawa.—A suggestion that in future parliamentary sessions should open in November and conclude on or about the first day of May, was made in the House of Commons by William Irvine, U.F.A., Wetaskiwin. Mr. Irvine expressed the opinion that the present practice of meeting parliament in February and continuing the session until well on in the summer months was an injustice to the western members and to those from the maritime provinces.

Dirigible Goes On Strike

London, Eng.—Completion of the new British dirigible R-100 on schedule appeared impossible because of the failure to settle a strike of about 29 workmen. Officials at the Howden Airship Works said the strikers insisted that the dispute be settled through direct negotiations with the Union. The R-100 will be one of the largest airships in the world. It was to undergo tests next month.

Newspaper Man Promoted

Calgary, Alta.—W. J. Watson, who has been secretary-treasurer and also a director of the Calgary Herald since it passed into the present ownership in 1908, is leaving Calgary at the end of the month to take the position of assistant to the president of the Southam Publishing Company at the head office in Montreal.

IN BRACKEN CABINET

Hon. W. R. Clubb, who resigned from Bracken cabinet, Manitoba, during Seven Sisters probe, has been reappointed minister of public works.

Sends Farewell Message

Stanley Baldwin and Premier King Exchange Greetings

Ottawa.—A farewell message which former Premier Stanley Baldwin sent to Premier MacKenzie King, on the day of Mr. Baldwin's resignation, and Mr. King's reply, were made public here. It was explained that publication of the telegrams was delayed until the prime minister's office here ascertained definitely that Mr. Baldwin's message was not intended as a purely personal communication.

Mr. Baldwin, under date of June 4th, cabled:

"I have today tendered my resignation to the King. On leaving office I should like to send you a message of farewell and sincere good wishes. It has been a great privilege to work in collaboration with you, and I wish to express my warmest thanks for your helpful co-operation during the last four and a half years, in all matters of common concern."

Mr. King replied:

"Your telegram, June 4th, May I express my deep appreciation of your message of farewell and good wishes. Throughout your tenure of office the most cordial relations have been maintained between His Majesty's governments in the United Kingdom and in Canada. It will always remain a source of deep gratification that I have been privileged to be associated with you in the many important matters of common interest that have marked these years."

King Resumes Few Duties

Is Now Able To Look After Part Of Work

London, Eng.—King George is now sufficiently well to resume many of the functions delegated by him to a council of state, but will not yet assume his full duties.

Among the duties which His Majesty will now transact will be all business connected with dominion affairs. But it was presented to His Majesty, that, for the better preservation of his health, he should not for the time being resume all functions he had delegated.

Attacks Lloyd George

Former Chief Whip Of Liberal Party Criticizes Methods Of Leader

London, Eng.—A lively attack on Rt. Hon. David Lloyd George, Liberal leader, is made in a letter to The Times by Vivian Phillips, former chief whip of the Liberal party. He says many Liberal candidates with whom he has talked since the election are of the opinion that Mr. Lloyd George is not an asset but a positive liability to the Liberal party.

"Only courage will save the party now," he writes. "Courage to turn back on the shams and pretences of the past two years and make a new beginning under new leadership which will inspire public confidence and trust."

"If it will break loose from the degrading bondage of the party funds, if it will follow character rather than cleverness, if it will set honor and principle once again in the place which they have held in the days of its former greatness, it may yet be preserved to wield its old moral authority in the state and be an instrument of beneficent service to this nation and the world."

Sapiro To Visit West

Will Conduct Speaking Tour In Saskatchewan This Month

Saskatoon, Sask.—In the interests of the Wheat Pool and under the auspices of the United Farmers of Canada, Saskatchewan section, Aaron Sapiro will conduct a speaking tour of Saskatchewan during the latter part of June.

Mr. Sapiro will reach here on June 26 from the east and speak here that evening, June 27 he will speak at Weyburn. The date for his visit to Moose Jaw is not definitely set yet, but will be either June 28 or July 2. If he does not speak in Moose Jaw on June 28, he will probably visit Regina on that day. On June 29 he will be at Swift Current, and July 1 at Kerrobert.

Bisley Team Sails

Members From Canada Have Left For Southampton

Montreal.—Canada's 1929 Bisley team was given an enthusiastic send-off on board the Canadian Pacific liner "Montrose" on which the team has commenced its voyage to Southampton.

Members of the team include Captain W. C. Colquhoun, Esquimaux, B.C.; Sgt. J. H. Regan, Victoria; Lieut. D. Fyvie, Canadian Scottish, Victoria; Lieut.-Col. R. M. Blair, Vancouver; Master Gunner S. Collins, Esquimaux.

Lieut. Desmond Burke, Ottawa, a former winner of the King's Prize, will join the team in England.

No Increase For Judges

Ottawa.—Having learned that parliament would not support an increase in judges' salaries, he did not think it desirable to attempt to force such a measure through, declared Hon. Ernest Lapointe, minister of justice, in the House of Commons. When the time came, and parliament was in a mood to endorse such an increase, he would make no delay, the minister said.

ROYAL GRAIN COMMISSION TO CARRY ON WORK

Lethbridge.—The immediate program of the Saskatchewan Royal Grain Commission will not be affected in any way by the political crisis in Saskatchewan, and even should the government of Premier James G. Gardiner, which appointed the commissioners, resign within the next week or two, no anticipation of curtailment of the inquiry is feared.

This was the belief made known by Chief Justice Brown, commission chairman, while the body held sessions in Lethbridge.

The inquiry in Alberta will be concluded with a session at Medicine Hat. The commissioners then expect to enjoy a week's vacation before visiting four or five rural points in Manitoba, holding a brief session in Winnipeg and a two-weeks' probe at Port Arthur and Fort William. If any changes in this program are made they will be announced by whatever government is in power in Saskatchewan, Chief Justice Brown stated.

Complaints of car distribution, shortage of cars during the rush season, and leakages, were lodged before the commission. John Maynard, superintendent of the Ellison Milling Company here, recommended placing an inspector at each railway division point to check car leakages.

Found Guilty Of Murder

Woman and Male Accomplice In Quebec Sentenced To Be Hanged

Hull, Que.—Philibert Lefebvre, and Mrs. Mary Viau Montpelier, Que., were found guilty at the Hull assizes of the murder of the woman's husband, Zephyr Viau, by poisoning, and were sentenced by Mr. Justice L. J. Loranger, to be hanged on Friday, August 23, at the Hull jail. The jury was out only 25 minutes.

In his charge, which lasted over an hour, Judge Loranger described the poisoning as one of the most despicable of crimes. There was no doubt, he said, that the murder had been planned for months.

The confessions of the accused showed that Lefebvre had provided Mrs. Viau with strychnine knowing for what purpose she would use it. Zephyr Viau had been very poor and every winter went away to work in a shanty. During his absence Lefebvre had visited the shack.

When asked if they had anything to say why the sentence of death should not be passed upon them, both prisoners muttered, "I am innocent and I ask for clemency."

Minorities Trust Canada

Dominion Will Reap Harvest Of Goodwill Says Hon. Philippe Roy

Victoria.—"Those masses of population are already looking to Canada as a strong advocate and a stout protector of their interests," Hon. Philippe Roy, Canadian minister to France, said in an interview here regarding the minority populations of Europe whose problems are now being considered by a special committee of the League of Nations.

"It must not be forgotten by Canadians," Mr. Roy said, "that there are 40,000,000 souls living in those European minorities. It is going to be a wonderful thing in a few years when Canada reaps the harvest of goodwill which has been sown by the announcement of Premier MacKenzie King, aligning Canada in support of the interests of the minority peoples."

Turning to reparations, Mr. Roy said the recent settlement of the war indemnities in Europe was the greatest forward step achieved by the nations since the armistice.

B.C. Mineralogist Dead

Victoria.—William Fleet Robertson, for twenty-three years provincial mineralogist, died recently at Everett, Wash., where he was taken ill while enroute to England via the Panama Canal route from Victoria. Mr. Robertson was born in Montreal, 1859, and was widely known in the western American mining world. He retired in 1925.

Eighteen "Count 'em", in One Family

The Clan MacLead arrived in Canada recently by the Canadian Pacific liner "Metagama"—at least if it wasn't the whole clan, it seemed like a large proportion. Donald, his brother Kenneth, and his son Allan were leaders of the family groups under Donald's command. Including grandchildren the party, which is bound en bloc for Centreville, Ont., numbered twenty-four ranging in age from forty-five years to six months. They had twenty-one pieces of baggage weighing 3,000 pounds.

WORLD'S FAMOUS THREE FUEL HART PARR

In special tests conducted by nationally known engineers who used cheap distillate fuel the great Hart Parr 18-36 registered a draw bar pull of 5,535 pounds at 2 miles per hour and 4,075 pounds at 3 miles per hour. On the belt it easily pulled the amazing load of 43 horse power. The Hart Parr is a three fuel tractor and will burn gasoline, kerosene or distillate equally well. It is the one tractor that develops its power from the cheapest low grade fuel. Hart Parris are made for small, medium or large farms and have three forward speeds to speed up hauling and field work. Drive yourself and experience the thrill of controlling tremendous power.

CARBON STAMPEDE EVENTS
HAVE BEEN ANNOUNCED

At a meeting of the Carbon Sports and Stampede Committees on Saturday night a full discussion of events and prizes took place and a real program has been outlined for the two days, July 1st and 2nd.

The first day there will be a monster parade and the first prize for the best decorated car will be \$20. The second prize \$10. There will also be a prize of \$5 for the best novelty car.

Athletic events of all kinds will be staged that day and among them will be special water sports in the Carbon swimming pool in the park, where the new dam has recently been constructed. In the afternoon two of the best senior baseball teams in the Province, Rockyford vs. Crossfield, will battle for high honors. There will also be intermediate ball games between Carbon, Acme, Three Hills and Rockyford.

The second day's program will consist principally of the Stampede and the following are some of the events which have been definitely arranged: Best Rider on Grounds, first prize of \$100; 2nd prize \$50; third prize, \$25; Wild Horse race, 1st \$25; 2nd \$10; third \$5. There will also be a Wagon race; Barrel race, Steer Riding, Calf roping, Pony races, Saddle races, Ladies saddle race, Wild Cow milking contest, Bucking events, etc., etc. and excellent prizes are being arranged. In the major events where the prize money is large there will be a small entrance fee.

During the two days a continuous carnival will be run by the Carbon Elks and each evening a big dance will be held in the Farmers Exchange hall. The proceeds of the entire two-day program will go towards the building of the new Carbon Elks Community hall and everyone in the town and district should feel that they are spending their money for a good purpose, so don't go away to some other place for those two days, but spend your time and surplus cash in Carbon, and you will be well repaid.

The admission fee to the grounds on July 1st, will be 50c for adults. On July 2nd, the stampede day, the admission fee will be \$1.00 for adults.

LET US ALL GET BEHIND THE CARBON ELKS ON THIS OCCASION AND BOOST FOR THE GOOD OF EVERYONE AND EVERYTHING.

C. H. NASH OFFERS PRIZES
FOR STAMPEDE PICTURES

C. H. Nash has offered three prizes for the best pictures taken of the Carbon Stampede on July 1st and 2nd. The first prize will be a hundred lb. sack of Robin Hood Flour. The second prize a 50 lb. sack of Robin Hood flour and the third prize a 25 lb. sack of Robin Hood flour.

Mr. Nash wants to use these pictures for calendar purposes, so get the very best possible views obtainable on the two days, July 1 and 2. All photos must be in by July 12th and when the winners have been named they will be published in the Carbon Chronicle.

Paint - Paint

I have just received a large shipment of LOWE BROTHERS high standard HOUSE PAINT in various assorted colors. Paint is determined only by the area it will cover efficiently, not by the price per gallon or quart. Paint values are determined by a yard stick, not by price per package and when it comes to actual values there is the other consideration of the brilliancy and durability of High grade paint.

LOWE BROTHERS outside white paint at \$3.65 per gallon with an absolute guarantee back of it, is the very best value ever offered the purchasing public of this district.

If you are in the market for RED BARN PAINT, my prices range from \$1.60 per gallon up.

Who Does Your
Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

WHEN IN NEED OF PRINTED MATTER CONSULT

The Chronicle, Carbon
